

Pysycache

Pysycache is an educative software for learn to the kids the mouse usage (move, click) with tree pleasant activies : uncover a picture, take a photography or leading an animal to its home).

Made for kids (4 to 7 years), Pysycache provides large buttons, some applause when a level is finished.

For each activity, there are few levels.

For each activity, there are few themes for make application more pleasant (and you can create your own themes!) as ABCBook, numbers, animals, plants, sports...

The “Move” activity teaches to move the mouse by uncover a photography.

(the “number” theme allows children to begin with numerotation)

The “click” activity teaches to click with the left button

The “buttons” activity teaches to click with the both buttons of the mouse

(this activity is very popular because it's very ludic : animals move slowly on the screen and you have to click on them !)

PySyCache is used in schools :

- in France
- in Spain (region of Extramadura)
- in Italy

Some articles about Pysycache have been published on the sites of CNDP, Clubic, Association des Paralysés de France...

PySyCache provides by default 50 pictures, but you can download more than 150 pictures in 9 additionnal themes
